Acebutolol, in hypertension, in diabetic patients	122
–/hydrochlorothiazide, in hypertension, compared with propranolol/hydrochlorothiazide	221
Amiloride/frusemide, in congestive heart failure	675
–, –, compared with bumetanide/potassium chloride	682
–, in hypertension, compared with amiloride/hydrochlorothiazide	690
Amiloride/hydrochlorothiazide, in congestive heart failure, compared with triamterene/hydrochlorothiazide	573
–, in hypertension, compared with amiloride/frusemide	690
Ampicillin/mecillinam, serum and renal tissue levels, in nephrectomy patients	117
Astemizole, in hay fever, compared with sodium cromoglycate	159
Aztreonam, in uncomplicated gonorrhoea	634
Baclofen, in multiple sclerosis, compared with tizanidine	699
Beclomethasone dipropionate, in childhood asthma, combined with salbutamol	548
Bendrofluazide/timolol, in hypertension, long-term follow-up	562
Benfluorex, in endogenous hypertriglyceridaemia	521
Betahistine, in recurrent vertigo, compared with cinnarizine	209
Bezafibrate, in Type II diabetics with hyperlipoproteinaemia, compared with fenofibrate	612
Bifonazole, in fungal skin infections	390
Bromocriptine, safety in hyperprolactinaemic female infertility	172
–, safety in long-term use	25
Buflomedil, in multi-cerebral infarcts dementia, pharmacological effects	380
–, in retinal diseases, vasoactive effects	457
Bumetanide/potassium chloride, in congestive heart failure, compared with frusemide/amiloride	682
Buprenorphine, in chronic pain, given sub-lingually	251
–, in post-operative pain, given alone or with naloxone	139
Captopril, with indapamide, in severe hypertension	313
Cefuroxime axetil, in upper respiratory tract infections	555
Chlorpromazine, with frusemide, in hypertensive emergencies	203
Cimetidine, endocrine and metabolic side-effects, compared with ranitidine	285
Cimetropium bromide, for premedication, in radiological examination of stomach and duodenum	319
Cinnarizine, in recurrent vertigo, compared with betahistine	209
Clobetasol propionate, in psoriasis, intermittent use	468
Diazepam, in hemiplegia, compared with tizanidine	709
–, sustained release, in neurotic disorders	10
–, –, for oral premedication, compared with standard formulation	235
Diflunisal, in osteoarthritis, compared with naproxen	436
Dihydrocodeine tartrate, in post-operative pain, compared with naproxen sodium	656
Endralazine, in hypertension, compared with hydralazine	150
Ergoloid mesylates, long-term effects in healthy elderly	256
Erythromycin, in skin infections, compared with mupirocin and flucloxacillin	339
Etodolac, in rheumatoid arthritis, compared with naproxen	540
Fenofibrate, in Type II diabetes with hyperlipoproteinaemia, compared with bezafibrate	612
Fenoverine, mechanism of action as synchronizer of smooth muscle motility	427
–, in gastro-intestinal spasmodic syndromes, compared with trimebutine	52
Fenticonazole, in fungal skin infections, compared with miconazole	107
Fipexide, in cognition disorders in the elderly	99
Flucloxacillin, in skin infections, compared with mupirocin and erythromycin	339

	Page
Flunitrazepam, in acute myocardial ischaemia, antifibrillatory effect compared with midazolam	527
Fructose-1,6-diphosphate, in lower extremity ischaemia, haemorheological effects	668
Frusemide, with chlorpromazine, in hypertensive emergencies	203
—, lack of interaction with mofebutazone	638
—/amiloride, in congestive heart failure	675
—, —, compared with bumetanide/potassium chloride	682
—, in hypertension, compared with hydrochlorothiazide/amiloride	690
Gliclazide, in Type II diabetics, long-term therapy	351
Glycosaminoglycan-peptide complex, in osteoarthritis	625
Hexetidine, antibacterial and antifungal properties	82
Hydralazine, in hypertension, compared with endralazine	150
Hydrochlorothiazide/acebutolol, in hypertension, compared with hydrochlorothiazide/propranolol	221
Hydrochlorothiazide/amiloride, in congestive heart failure, compared with hydrochlorothiazide/triamterene	573
—, in hypertension, compared with frusemide/amiloride	690
Hydrochlorothiazide/triamterene, in hypertension, alone or combined with oxprenolol	196
Ibuprofen, in soft-tissue rheumatism, alone or combined with meptazinol	663
Indapamide, in severe hypertension, combined with captopril	313
Indomethacin, in rheumatoid arthritis, effect of differing sustained-release forms on night pain and morning stiffness	592
Isosorbide mononitrate, in coronary heart disease, compared with isosorbide dinitrate	601
Isoxicam, in rheumatoid arthritis, pharmacokinetics in the elderly	580
Ketoprofen, in rheumatoid arthritis, plasma and synovial fluid profiles with standard and controlled-release forms	73
Ketotifen, in adverse reactions to foods, clinical and immunological effects	346
Levonorgestrel/ethinyloestradiol, triphasic oral contraception	503
Lignocaine, in post-episiotomy pain, alone or with mefenamic acid	375
—/cinchocaine, in post-episiotomy pain	364, 370
Loprazolam, in geriatric patients, hypnotic effects	17
Mecillinam/ampicillin, serum and renal tissue levels, in nephrectomy patients	117
Mefanamic acid, in acute soft tissue injuries, compared with piroxicam	645
—, in post-episiotomy pain, alone or with lignocaine spray	375
Mefruside, in hypertension, effect on renal and platelet function alone or with nefedipine	441
Meptazinol, in soft-tissue rheumatism, alone or combined with ibuprofen	663
Mequitazine, in vasomotor rhinitis	330
Miconazole, in fungal skin infections, compared with fenticonazole	107
Midazolam, in acute myocardial ischaemia, antifibrillatory effect compared with flunitrazepam	527
Mofebutazone, lack of interaction with frusemide	638
Mupirocin, in skin infections, compared with flucloxacillin and erythromycin	339
Naftidrofuryl, in rehabilitation after ischaemic stroke	58
Nalbuphine, supplement to isoflurane and enflurane anaesthesia	531
Naloxone/buprenorphine, in post-operative pain, combined with buprenorphine alone	139
Naproxen, in osteoarthritis, compared with diflunisal	436
—, in rheumatoid arthritis, compared with etodolac	540
— sodium, in post-operative pain, compared with dihydrocodeine tartrate	656
Nicardipine, in chronic bronchial asthma, effects of prolonged treatment	422

	Page
Nifedipine, in the hypertensive elderly	407
—, in hypertension, effect on renal and platelet function alone or with mefruside	441
—, —, alone or combined with other antihypertensive drugs	566
Ofloxacin, effect of food on pharmacokinetics	166
—, bioavailability of tablets and oral solution	514
—, lack of interaction with phenprocoumon	474
Ossein-hydroxyapatite compound, effect on bone healing	241
Oxethazaine/antacid, in ulcer pain, compared with antacid alone	128
Oxprenolol, in hypertension, combined with hydrochlorothiazide/triamterene	196
Penbutolol/piretanide, in hypertension	397
Pentoxifylline, antithrombotic effects in rats	94
—, in peripheral arterial occlusive disease, haemorheological effects	135
Phenytoin, gum hypertrophy	652
Pinaverium bromide, drug interactions	1
—, in biliary and pancreatic diseases, use in endoscopy premedication and effects on sphincter of Oddi	280
Pindolol, in hypertension	296
Pipothiazine palmitate, in schizophrenia	326
Pirazolac, in rheumatoid arthritis, effects in synovial fluid	494
Piretanide/penbutolol, in hypertension	397
Piroxicam, in acute soft-tissue injuries, compared with mefenamic acid	645
Propentofylline, antithrombotic effects in rats	94
Propranolol, in cardiac arrhythmias, effects of standard and long-acting forms	215
—/hydrochlorothiazide, in hypertension, compared with acebutolol/hydrochlorothiazide	221
Ranitidine, endocrine and metabolic side-effects, compared with cimetidine	285
Salbutamol, long-term regular use	228
—, in childhood asthma, combined with beclomethasone dipropionate	548
Sodium cromoglycate, in hay fever, compared with astemizole	159
Spironolactone, in premenstrual syndrome	450
Tiaprofenic acid, in rheumatoid diseases, standard and sustained-release forms	486
Timepidium bromide, effect on motor activity of sphincter of Oddi	596
Timolol/bendrofluazide, in hypertension, long-term follow-up	562
Tizanidine, in hemiplegia, compared with diazepam	709
—, in multiple sclerosis, compared with baclofen	699
Triamterene/hydrochlorothiazide, in congestive heart failure, compared with amiloride/hydrochlorothiazide	573
—, in hypertension, alone and with oxprenolol	196
Trimebutine, in gastro-intestinal spasmodic syndromes, compared with fenoverine	52
Trimipramine, in rheumatoid arthritis	89
Trimoprostil, effect on gastric acid	308
—, effect on nocturnal gastric secretion	145
Vaccine, influenza, effects on 1986/1987 viral strains	414
—, rubella, in adult male volunteers	291
